- Plug a ClickShare button into your laptop and start your call – as simple as that

- Easily share content from any other laptop or PC in the room via its button or app into an existing call

- Applicable to any size room

Businesses are asking the following questions regularly:

- How do you get people to collaborate effectively using the existing UC solutions within the enterprise?
- How do you seamlessly connect everyone from different boardrooms, devices and locations?
- How do you do it all while delivering a great technology experience?

The answer is Barco ClickShare Conference. This powerfully intuitive technology allows people to collaborate more frequently, effectively and effortlessly, wherever they happen to be. ClickShare Conference introduces a new era of wireless conferencing. With collaboration and conferencing transformed, your people can truly click and work together seamlessly.
